DETAILED ACTION

Reissue Applications

1. The reissue oath/declaration filed with this application is defective because it fails to identify at least one error that is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414. The statement that "The original attorney of record failed to appreciate the full scope of the invention" is not a description of a specific error. A new declaration is required.
2. The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.
3. The claims in the divisional reissue application, 10/101452, have been found to be allowable. Inasmuch as there were no defects in the instant parent reissue application, the claims examined in the divisional application (and held non-elected in the instant application) have now been rejoined in the instant application. While the claims in the divisional reissue application were amended in response to an office action, on further consideration, the Examiner has determined that the rejection in the divisional application was not merited and, therefore, the amendments to the claims unnecessary.
